

Lesson 6-1

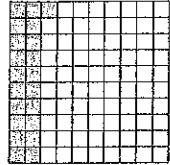

Percents, Fractions, and Decimals

Lesson Objective To convert between fractions, decimals, and percents	Common Core Standard Expressions and Equations: 7.EE.3
---	--

Key Concepts

Fractions, Decimals, and Percents
 You can write 21 out of 100 as a fraction, a decimal, or a percent.

Fraction	Decimal	Percent
$\frac{21}{100}$	0.21	21%

Examples

① **Writing Decimals as Percents** Write 0.101, .008, and 2.012 as percents.

$$\begin{aligned}
 0.101 &= \frac{101}{1000} & 0.008 &= \frac{8}{1000} & 2.012 &= \frac{2012}{1000} & \leftarrow \text{Write as a fraction.} \\
 &= \frac{10.1}{100} & &= \frac{0.8}{100} & &= \frac{0.2012}{100} & \leftarrow \text{Write an equivalent fraction} \\
 &= 10.1\% & &= 0.8\% & &= 0.2012\% & \leftarrow \text{Write as a percent.}
 \end{aligned}$$

with 100 in the denominator.

② **Writing Percents as Decimals** Write 6.4%, .07%, and 3250% as decimals.

$$\begin{aligned}
 6.4\% &= \frac{6.4}{100} & .07\% &= \frac{0.07}{100} & 3250\% &= \frac{3250}{100} & \leftarrow \text{Write the percent as a fraction.} \\
 &= 0.064 & &= 0.0007 & &= 32.5 & \leftarrow \text{Divide.}
 \end{aligned}$$

Quick Check

1. Write 0.607, 0.005, and 9.283 as percents.

60.7% 0.5% 928.3% 0.607 0.005 9.283

2. Write each percent as a decimal.

a. 3500% 35 b. 12.5% 0.125 0.78% 0.0078

Examples

③ **Writing Percents as Fractions** Write each percent as a fraction in simplest form.

a. 12%

$$12\% = \frac{12}{100}$$

$$= \frac{12 \div 4}{100 \div 4}$$

$$= \frac{3}{25}$$

Write as a fraction with a denominator of 100.

Divide the numerator and the denominator by the GCF.

Simplify the fraction.

b. 45%

$$45\% = \frac{45}{100}$$

$$= \frac{45 \div 5}{100 \div 5}$$

$$= \frac{9}{20}$$

④ **Ordering Rational Numbers** Order $\frac{3}{5}$, $\frac{2}{10}$, 0.645, and 13% from least to greatest. Write all numbers as decimals. Then graph each number on a number line.

$\frac{3}{5} = 0.6$ ← Divide the 3 by the 5

$\frac{2}{10} = 0.2$ ← Divide the 2 by the 10

0.645 ← This number is already in decimal form.

13% = 0.13 ← Move the decimal point 2 places to the left.

$$\begin{array}{r} 0.6 \\ 5 \overline{) 3.0} \\ \underline{-3.0} \\ 0 \end{array}$$

Quick Check

3. An elephant eats about 6% of its body weight in vegetation every day. Write this as a fraction in simplest form.

$$6\% = \frac{6}{100} \div 2 = \frac{3}{50}$$

$$\frac{7.5}{20.5} = \frac{35}{100}$$

$$\frac{11.4}{25.4} = \frac{44}{100}$$

4. Order from least to greatest.

a. $\frac{3}{10}$, 0.74, 29%, $\frac{11}{25}$

$$29\%, \frac{3}{10}, \frac{11}{25}, 0.74$$

b. 15%, $\frac{7}{20}$, 0.08, 500%

$$0.08, 15\%, \frac{7}{20}, 500\%$$

$$15\% = 0.15$$

$$\frac{7}{20} = 0.35$$

$$0.08$$

$$500\% = 5$$

© Pearson Education, Inc., publishing as Pearson Prentice Hall.

$$\frac{3}{10} = 0.3$$

$$0.74$$

$$29\% = 0.29$$

$$\frac{11}{25} = 0.44$$
